## Quality

We are aware of the high responsibility that we bear with our products and we also stand behind the delivered quality. Careful selection of our suppliers and many years of cooperation with trustworthy business partners enable us at Bayka to make an important contribution to quality assurance even before production starts.

## Longevity

More than 130 years of experience in cable production result in maximum technical competence in development, design and production. We fully apply this know-how for the success of our customers.

## Innovation

As a medium-sized company, we are always anxious not only to meet the requirements of the market, but also the very special needs of each customer. For this reason, even our market-leading business partners have frequently relied on Bayka's innovative strength for several decades. We always see custom-made products as a new challenge that needs to be mastered.

## Individuality

There is no single solution to every problem, but there is always a technology to meet the individual needs of every requirement. As a long-standing partner, we have initiated numerous innovations for Deutsche Telekom AG, Deutsche Bahn AG, energy supply companies, the federal water and shipping authorities and other customers.

## Trust

We deliver to the whole of Europe, the Middle East, China and almost every place in the world. Customers around the world trust in the quality of our cables and our highly reliable deliveries.

## Sustainability

Our employees ensure successful environmental management at our sites. Environmental protection covers the entire product development and life cycle. In cooperation with the competent authorities, we ensure that the applicable environmental regulations and laws are strictly observed and monitored. We keep energy consumption, refuse and wastewater to a minimum. Reducing emissions and responsible handling of hazardous substances are our top priorities.
